

Project 4 Description

Create an HTML file that reads a JSON file that contains the text based representation of the following object and displays the information stored in that JSON object.

```
firstName string;  
lastName string;  
grades ['A', 'B', 'B', 'A', 'A', 'B', 'A', 'A'];  
credits 24;
```

Save and upload the HTML file, and the JSON file within a zip file Project4.zip.
